

Autotime Video Flat-Screen

A fully integrated computer & LCD panel

The AVF screen is a fully integrated computer solution that conveniently mounts to any surface, conserving desktop space and enhancing your personal work area. The integrated GEOFLEX 266 SBC with single wire interface eliminates the need for space consuming towers and turns bulky PCs into stylish and compact workstations.

The Autotime Video Flat-Screen (AVF) is ideal for Point of Sale, shop floor or RV/boating applications. Its low power, small form design makes it a great fit in tight spaces (it fits into a thin one inch frame!!) enabling a wide new range of vertical applications.

Features:

- Integrated GEOFLEX 266 SBC
- 20-60 Gig Harddrive
- WiFi or 10/100BaseT connectivity
- Wireless keyboard/mouse (opt)
- Touch screen available
- Wall mountable
- 15 inch XGA (1024*768) display
- Sleek, space saving design
- Display rotates 360 degrees, swivels 150 degrees and tilts +/- 12 degrees
