

# Presentation Server

## Your Power Point Partner

- ▶ 20 inch LCD TFT Display
- ▶ Daylight Readable at 450 Nits
- ▶ Display PowerPoint Files
- ▶ 10/100 ethernet or wireless network
- ▶ Great for School, Office, Tradeshow Retail, Hotels and Restaurants.

Optional Water Proof enclosure available

The Autotime Presentation Server (**APS**) is ideal for *automated signage*. Yet it's easy to use for even simple messages. The animation and brilliance of the display gets the attention you need. The **APS** works with Power Point files that you upload from a desktop or laptop computer. The **APS** can be wall mounted or free standing. It is ideal for retail, training seminars, and business environments. WiFi option allows for convenient indoor or out-door installation. (Just add power).

# CD-ROM JukeBox

## Stores Over 2000 CDs

### Powered by GeoFlex32

- ▶ Touch Screen user interface
- ▶ 12 inch SVGA display
- ▶ 48x CD-ROM
- ▶ Built in four channel 40 Watt Amp
- ▶ Surround Sound interface (optional)
- ▶ 10/100BaseT ethernet connection
- ▶ WiFi Connectivity (optional)
- ▶ Recessed wall design

The Autotime CD JukeBox is designed to recess into a standard wall, providing built-in convenience and minimizing space. Integrated into the JukeBox is a four channel 40 watt amplifier which allows you to fill the room with sound. There is an optional surround sound interface to connect a premium sound system for the audio buff. An Ethernet or WiFi connection allows the JukeBox to talk with and receive music from your personal computer there by allowing you to have a central library of music files. Your Music library is available for immediate play by the JukeBox or can be sent for play to any other system in the home.
